LOCAL PILOT ACTION PLAN

Country: Spain

Organization: ABD

Realization of the Pilot: from 17th May to
31st October 2024

Professional figures involved: 6

Number of interventions: 14

Where the pilot was implemented: public
space in nightlife area

Stand for prevention and awareness of gender violence, lgtbiphobic violence and risk reduction in consumption.

Implemented in Sant Cugat's nightlife area, where bars, clubs and social gatherings in public space ("botellón") coexist.

Description of strategies.

- Breathalyzer tests.
- Quiz game about gender, sexualities and substances to get prevention materials (internal, external and finger condoms, lub).
- Didactic materials. Anatomic models, sextoys, condoms, informative leaflets, genderbread person map.
- First aid assistance. Water, snacks, thermal blankets, chairs, emotional support.
- Coordination among public and private agents (emergency services, police, city council, club manager).

Impact and description of target audience.

The target audience consists of young people between 16 and 20 who visit the nightlife scene in Sant Cugat. The group is heterogeneous, as it includes both upper-class youth from Sant Cugat and lower- to middle-class individuals from the surrounding suburbs of Barcelona and Sant Cugat.

- 17 professionals trained
- 5 stakeholders involved
- 56 hours of intervention in 14 nights
- Approximately 200 people per night reached
- 280 interventions registered
- 200 breathalyzer tests
- 4 lilac protocols implemented
- 10 critical events managed
- +100 information materials distributed
- +1.500 preventive materials distributed (internal and external condoms, oral dams, finger condoms, lub)

Do you think this is an inclusive space (everyone is accepted whoever they are)? (participants' satisfaction questionnaire)

77,6% of the people consider the space as inclusive in contrast to 22,4% who doesn't fully consider so.

If you think not, why?

"There has been many occasions where someone has been denied access to the club because of their physical appearance, giving excuses on norms/dress code but being ethnicity or skin colour the reason (especially in men). I think it is a quite racist and classist environment"

I went to the CRISSCROSS stand because...

- 63,4% of the people approached the stand out of curiosity
- 17% approached the stand because someone else told them about
- 20,9% came looking for condoms
- 14,4% came looking for information on sexualities
- 12,4% came for breathalyser testing
- 11,1% came because they felt it as a safe space

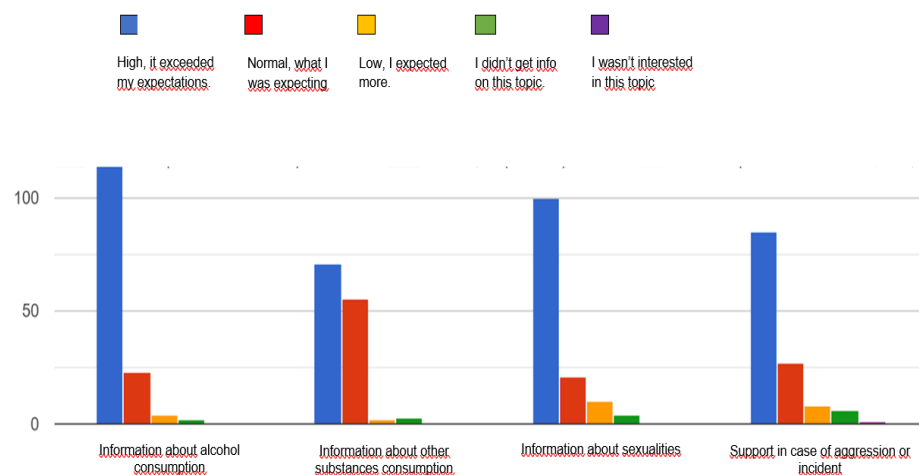

About the information you received, how would you rate your satisfaction? (participants' satisfaction questionnaire)

People who came looking for information (about alcohol, other substances or sexualities) reported 285 times that their satisfaction was high, exceeding their expectations, versus 99 times where that information simply filled their expectations.

Regarding people who came looking for support in case of aggression or incident, 85 people reported their satisfaction with the attention given was high.

Is there anything else you would like to say about the CRISSCROSS stand? (participants' satisfaction questionnaire)

"I think it is a very necessary space for parties, it creates a safety and educational environment, very nice. I would like to see more of this kind of stands at the club's entrances".

Qualitative assessment of the professionals regarding the intervention

Also as part of the team working on the ground, we have noticed that some of the people that used our service were really pleased with our service and described our presence at the Sant Cugat's nightlife area as "important", "crucial" and "necessary".

Additionally, we have observed that many of the people passing by our Infostand and using our alcohol checking service, have changed part of their habits regarding the consumption of alcohol and/or used our Infostand point in order to have a break, take care of themselves and/or their friends and keep track of their drinking habits. Also, there were occasions when people were commenting how the information we were offering regarding different sexual practices, safe sex and different sexual orientations and gender identities, changed the way they could respond to situations in their private lives in general and/or during the parties they are attending.

RE-Generem la festa!

Gaudeix la nit

REconeix

REivindica

Tothom ha de poder gaudir la festa lliure de violències. Com més siguem, més riurem. La diversitat és divertida.

REacciona

La festa és un espai col·lectiu. Promoguem una cultura de la responsabilitat junts. La violència només la podem frenar entre tots. Trencar el silenci i no sigui còmplice.
